

A very powerful and wall mounted dehumidifier!

Wood's WPF52 is a wall mounted dehumidifier made for larger areas such as libraries, museums, offices, basements, laundries or indoor pool rooms. With its high capacity and noise free operation, this dehumidifier is perfect for larger areas that demand rapid and efficient dehumidification.

Wood's WPF52

This clever Wood's dehumidifier is developed especially for larger areas such as libraries, museums, offices, cellars, laundries or indoor swimming pool rooms. With its high capacity and quiet operation this dehumidifier is perfect for large areas that demand rapid and efficient dehumidification without a disruptive environment. The WPF52 is wall mounted and by placing the unit on the wall you lose no valuable space in, for example, offices or libraries. Connect a hose to the unit for continuous drainage, this way you never have to de-mount the dehumidifier and you are ensured quick and reliable operations.

Advantages:

- For laundry, basements, museums etc.
- Removes excess moisture and bad odour
- IP-rated for tough environments
- Exhaust on top blow-dries laundry
- Hose connection for direct drainage
- Automatic defrost
- Automatic restart after power failure
- Runs only when needed

Technical data

| | |
|--|-----------------------|
| Max. pool surface area | 24 m ² |
| Max. working area (no source of steam) | 380 m ² |
| Capacity (at 20°C & 70% RH) | 25 litres/day |
| Capacity (at 35°C & 80% RH) | 58 litres/day |
| Air flow | 600 m ³ /h |
| Power (at 20°C & 70% RH) | 700 W |
| Max power (at 35°C & 80% RH) | 950 W |
| Sound level | 49 dB |
| Working interval | +10°C to 35°C |
| Defrost | Electronic |
| Gas | R410A (600 g) |
| Dimensions (mm) | 1008x211x602 |
| Weight | 48 kg |
| IP Rating | IP22 (X2) |
| Fan speeds | 1 |
